Summary

Enthusiastic backend developer with hands-on experience in building scalable applications using Node.js, MongoDB, and TypeScript. I am passionate about delivering seamless user experiences and constantly improving my technical skills to solve complex challenges in a fast-paced environment.

Technical Skills:

- **Programming Languages:** JavaScript, Java
- **Frontend Development:** HTML, CSS, ReactJs, NextJs, Tailwind CSS
- **Backend Development:** Nodejs, expressJs
- **Database Management:** MongoDB, PostgreSQL, Firebase
- **Tools & Technologies:** Git, GitHub, Docker, Postman, Prisma

Related Coursework:

Web Development | Database Management | State Management | Programming Fundamentals

Work Experience:

Backend Developer at Melody Mocktail May 2023 - Sep 2023

- Developer and maintained a housing website using MongoDB and TypeScript, optimizing data storage and retrieval, resulting in 30% improvement in response time and enhancing overall experience.
- Collaborated with Frontend Developers to integrate RESTful Api's, improving backend-to-UI and reducing page load by 25%.
- Participated in group meetings and collaborated on team projects, enhancing communication and teamwork skills.
- Optimized database queries in MongoDB, resulting in a 40% increase in database performance, enabling the platform to scale efficiently.

Backend Developer at Qubicgen May 2023- Present

- Developed a comprehensive Employee Management System, improving HR operations and employee data management efficiency by 30%.
- Created a dynamic portfolio website for the company, showcasing projects and achievements, which enhanced the company's online presence and client engagement.
- Implemented RESTful APIs and integrated third-party services to streamline backend processes and enhance system functionality.
- Collaborated with frontend developers to ensure seamless integration between the backend and user interfaces, resulting in a more cohesive and user-friendly application.

Projects:

Ticketing Tool (NextJs, ExpressJs, MongoDB, Tailwind CSS)

- Developed a comprehensive ticketing tool utilizing NextJs for frontend and ExpressJs for backend.
- Implemented MongoDB for database management to store and retrieve ticketing information.
- Designed intuitive user interfaces for creating, updating and managing tickets.
- Incorporated authentication and authorization features for secure access controls.
- Utilized RESTful APIs for efficient communication between frontend and backend.

Project Management System (ReactJS, expressJS, PostgreSQL, Prisma)

- Designed and developed a robust Project Management System using React.js, express.js and PostgreSQL, facilitating streamlined HR operations, including employee onboarding, attendance tracking, and performance evaluation.
- Implemented secure user authentication and authorization features, ensuring data integrity and confidentiality in compliance with industry standards.
- Enhanced employee productivity by implementing interactive dashboards and reporting tools, providing real-time insights into workforce analytics.
- Developed scalable APIs to facilitate seamless integration with existing HR systems and third-party applications, enhancing system interoperability and data exchange capabilities.
- Implemented role-based access controls (RBAC) to enforce granular permissions, ensuring that sensitive employee information is accessed only by authorized personnel.

Education:

Bachelor of Technology in Civil Engineering | Srinivasa Ramanujan Institute of Technology |
2019-2023
